WHEN WE ALL FINISH FINALS...

WHAT A BAD WEATHER TODAY

New York City, NY As of 12:11 pm EST

53°

Rain Shower

Day 53° • Night 37°

⚠ Coastal Flood Warning +2 More

TAYLOR

Hey, I got an A+ in cloud computing and big data!!!!!!

Congrats! Let's celebrate!!!!!!

Let's go to karaoke

Oh oh.....

But it's raining now....

Aa

TAYLOR

Hey, I got an A+ in cloud computing and big data!!!!!!

Congrats! Let's celebrate!!!!!!

Let's go to karaoke

Oh oh.....

But it's raining now....

It's okay. Try This!!!

SYSTEM ARCHITECTURE

WEBRTC PEER CONNECTION (PC) ALGORITHM

TECHNICAL ISSUE: MUSIC & VOICE SYNCHRONIZATION

- Voice always comes after music, but peer's voice propagation takes time
(Red + Blue > Red)
- Voice data congestion
- Network connection quality

PERFORMANCE EVALUATION

POTENTIAL SOLUTIONS

- **Solutions for Voice Congestion**

- Implementing Load Balancing Across Multiple EC2 Instances using Kubernetes and Elastic Load Balancing (ELB)
- Enhancing Performance through Vertical Scaling of EC2, OpenSearch, and RabbitMQ

- **Challenges in Online Music Voice Synchronization**

- Human's High Sensitivity to Rhythm Synchronization in Music Audio and User's Voice
- Current Examples Showcasing Synchronization Challenges: Zoom, Google Meet, Discord

THANK YOU
